

# Maths Week Scotland in Primary 2/1

Our week has been filled  
with a lot of outdoor  
learning!

We explored measurement outside.  
We were estimating weight using  
apples from our tree and explored  
length by measuring the distance  
between trees!

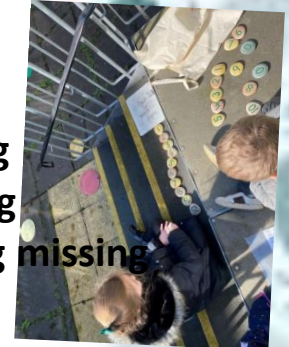

We read lots of  
stories about  
numbers!

We have been practising  
number formation.

We enjoyed ordering  
numbers, sequencing  
numbers and finding missing  
numbers.

We played skittles to  
practise addition and to  
order from most to least!

We even wrote the  
number names  
instead of the  
numerals!
