

# Maths Week Scotland in Primary Six

We have also been using lots of different Maths skills such as place value, mental addition/subtraction and multiplication/division to work out lots of word problems and solve little Maths mysteries.

We worked together as a team to put all of our Maths brains together to work out the dastardly culprits.

We also signed up to Maths Week Scotland's Contest on SumDog and have been competing against other pupils across the whole of Scotland!

We joined a live web chat with the creator of Dekko Comics.

We spoke to Rossie, the founder, and asked him what inspired him to create comics to help kids learn.

We then had a go at drawing our own comic strips to help us learn new Maths concepts too.
